Golfing places a lot of emphasis on the lower back and spine, that's why it is important to have a good quality mattress and a good night's rest as it can help you to be your best during the day. Sealy Posturepedic® Resort Collection is made to help you relax and recover after each game, every night.

Ti TITANIUM
Ti (TITANIUM) is a trademark of Sealy
*Designed in co-operation with leading orthopaedic surgeons.

Sealy's unique SRx® support system is designed to sense your body's weight and motion and to respond with initial conforming support and firmer deep-down support your body needs.

Backed by orthopaedic research, Sealy Posturepedic® technology works to align your body with the appropriate level of support. Our patented coils work in harmony with high quality pressure relieving foams to help you achieve a deep and restful sleep so you can focus and concentrate on the golf course!

Golf is not only useful in improving heart health and reducing stress, but also mentally stimulating and a physically demanding sport that can result in lower back pain and injury, affecting a golfer's ability to play. Sleeping on a bed that allows proper weight distribution and keeps your spine straight can however alleviate lower back pain.

A 13" plush top mattress made from Belgium natural latex and high density foam, the MaxCoil Oxygen Plus Oxford mattress offers medium firm comfort and optimal spine support. Oxygen Plus mattress ticking offers a natural freshness to your sleep quality by providing ion emission in the sleep atmosphere and eliminates harmful particles thus increasing the quality of air we breathe in. Negative ions also help with fast recovery from fatigue and improve respiratory functions.

In another words, you can design your own comfort based on your preference, and even your physical condition that may changes from time to time.
